Best of Both Worlds

The complex molecular structure of Memory Mattress Topper ensures that it will always feel slightly firm when you first lie on it, but this changes within seconds as it 'submits' to the body's weight and allows you to sink into it without any sag.

Feeling is believing!

Unique Memory Foam developed under the inspiration of NASA (North American Space Agency) to counter G-forces.

Improves posture by encouraging the natural alignment of the spine. Designed to treat and help alleviate an existing condition.

Some Handy Hints

- Turn Memory Mattress Topper regularly to spread the load and minimise potential 'soft spots'. Some softening, as well as initial firmness, should be expected and is not a manufacturing defect.
- Foam is prone to discolour when exposed to natural light. This will **not** affect its characteristics and performance.
- Do not use with an electric blanket.
